

# Surface Mount Metal Infrared Exit Button

## Product description

N-C3 is an externally rated infrared architrave exit switch. Infrared detection activates the switch with a wave of the hand which is adjustable between 3-15cm, allowing activation without direct contact with the device. This is ideal for sterile environments and general high traffic areas such as hospitals, public buildings etc. Coupled with the IP68 rating it's a great solution for "No Touch" activation and external environments.

The IR sensor can be connected directly to an access control device to be used as an exit button. The bi-coloured LED indicator provides visual verification to the user.

## Product Specifications

**Material:** Zinc alloy

**Mounting:** Surface architrave

**Switch type:** Infrared detection

**Relays:** Single pole NO/NC/COM

**Distance adjustment:** 3-15 cm

## Electrical Specifications

**Power input:** 12-24Vdc

**Contact rating:** 2A @ 24Vdc

## Key features

- High quality aluminium
- "No Touch" activation
- Adjustable detection range
- Externally rated
- Multicoloured LEDs
